Where To Buy Games For Mac

• Since you're running Mojave, clicking Get will launch the interface in System Preferences and start downloading the approximately 5...2GB High Sierra Installer • Once it's done downloading, the installer will attempt to run but you'll receive an error that the installer is "too old" to run (obviously since you're already running a newer version of macOS). Dismiss the warning and quit the installer app • This should take you to the macOS High Sierra page in the Mac App Store.. Install outlook for mac high sierra
